Favour Mbata

Frontend Engineer

My Self

I'm a passionate Frontend Engineer with expertise in creating intuitive and responsive user interfaces. I excel at turning complex design concepts into efficient, clean, and scalable code using modern JavaScript frameworks. With a strong foundation in web technologies and a commitment to excellence, I thrive on continuous learning and collaboration to deliver high-quality, user-centric solutions. My experience equips me with the skills to tackle diverse challenges in frontend development, making me an asset to any team.

Projects

FGCG WebApp

Church Website   Website Link
